

SOME C: NEW USD 36 MILLION ORDER FOR PROJECT IN BOSTON'S SEAPORT DISTRICT

The Group, through its subsidiary Fabbrica LLC, will supply the engineered façade systems to the new 18-story building to house offices and stores in one of the city's most attractive and vibrant areas

San Vendemiano (TV), 02 December 2021 - **Somec S.p.A.**, a company listed on the Euronext Milan market (Italian Stock Exchange) and specialized in the engineering of complex turnkey civil and naval architecture projects, through the US subsidiary **Fabbrica LLC**, has won a new order for the production of the engineered façade systems for the new building located at 88 Seaport Boulevard in Boston's seaport district, for a value of over **USD 36 million**.

Located in one of the most vibrant and attractive areas of the city, the building will rise to 18 stories and host about 40 thousand sq. meters of class A offices, 6 thousand sq. meters of stores and 500 sq. meters for civic and cultural spaces. The exterior building design was created by the OMA*AMO (design) and Jacobs (AOR) architectural firms.

Fabbrica LLC will oversee the design, engineering and production of over 17,000 sq. meters of curtain walling of the building, including a dramatic 8-story sloped glass façade that will provide natural light to the interior spaces. Fabbrica LLC was chosen for its capacity to manage complex projects, offering innovative and cutting-edge solutions in terms of sustainability, in addition to its design knowledge and technical skills.

Works are scheduled to begin in Q2 2022, with delivery by Q1 2023.

These latest orders bring the year-to-date Somec Group order intake to a record Euro 318 million, with a total Group order backlog at June 30, 2021 of Euro 826 million.

"This is a record year for the Somec Group and I am very satisfied with this new major Fabbrica order that follows those obtained for the Massachusetts General Hospital and for a prestigious building between 5th and 53rd in New York. This further confirms our ability to participate in international projects requiring innovative and high-quality solutions," stated **Oscar Marchetto, Chairman of Somec**, *"The North American construction industry is quickly evolving and, thanks to the construction and engineering qualities of Fabbrica, our Group has taken up a leading role".*

SOME C

SOME C S.p.A. is specialized in the engineering, design and implementation of turnkey construction in naval and civil architecture projects, particularly in engineered systems of naval architecture and civil building facades; professional kitchen systems and products; design and creation of bespoke interiors. The group companies operate a common business model, focused on different project phases, following rigorous quality and safety standards in civil and naval engineering.

The projects managed by the Group stand out for the high degree of customization and for the specific know-how in different materials, a mandatory pre-requisite in high added-value projects.

SOME C has achieved a reputation for quality build and operational and financial reliability on a global scale, though a rigorous certification process. SOME C is headquartered in San Vendemiano (TV), with companies in the USA, Canada, Slovakia and China, employs around 800 people and reached a turnover of 223.4 million euros in 2020.
