

SOMEC: FURTHER MAJOR NAVAL GLAZING CONTRACTS SECURED WORTH 54 MILLION EURO

The aggregate value of orders secured in the first half of 2026 exceeds 330 million Euro

San Vendemiano (Treviso), June 29, 2026 – Somec S.p.A. (Euronext Milan: SOM), specialising in the engineering, manufacturing and installation of complex turnkey projects for the civil and naval sectors, announced that it has secured new contracts with an aggregate value of 54 million Euro. The award comprises two separate orders placed by a leading Italian shipbuilding group for the supply and installation of glazing systems across seven new-build cruise ships destined for two major international cruise lines.

The first order, worth 44 million Euro, covers the supply and installation of glazing systems across five cruise ships for a major international operator. The scope of work encompasses the comprehensive outfitting of cabin balcony areas.

The second order, also destined for an international cruise line - with a value in the region of 10 million Euro - covers the supply and installation of glazing for the public rooms of two new vessels.

The nature of the works entrusted to Somec underscores the pivotal role that architectural glazing elements play in next-generation vessels, where transparency, luminosity and unobstructed sightlines between interiors and exteriors have become defining design features.

Operational activities for both orders are scheduled to commence in 2027 and run through to 2036, with the financial impact distributed across the entire period.

These new contracts bring the aggregate value of orders secured and disclosed to the market during the first half of the 2026 financial year to more than 330 million Euro, with contributions from all three of the Group's divisions: Horizons, Talenta and Mestieri.

Oscar Marchetto, Chairman of Somec stated: *“Having disclosed to the market orders worth more than 330 million Euro in the first half alone represents a very tangible indication of the strength of our market positioning and the depth of international demand across the different sectors in which we operate. Within this context, despite a challenging geopolitical backdrop, the international cruise industry continues to demonstrate a robust commitment to capital deployment and a long-term vision, underscoring a growth potential that feeds into solid, multi-year programmes. As Somec Group, we are proud to deploy our workforce and expertise in support of projects that increasingly stand out for innovation, sustainability and a strong focus on details, the ultimate goal being passenger well-being and experience.”*
