PRESS RELEASE

FABBRICA LANDS IN EUROPE: THE NEW INTEGRATED HUB FOR THE DEVELOPMENT OF THE CURTAIN WALL BUSINESS IN EUROPE IS BORN WITH THE INCORPORATION OF FABBRICA EUROPE.

Oscar Marchetto, Chairman of Somec: "*We are consolidating expertise, production capacity and international experience to build an efficient, flexible and competitive European platform*"

San Vendemiano (Treviso), October 12, 2026 – Somec S.p.A. (Euronext Milan: SOM), specialising in the design, production and installation of complex turnkey projects in the civil and naval sectors, announces the incorporation of Fabbrica Europe S.r.l., a new company owned by Somec S.p.A. and part of the *Horizons – Engineered Systems for Naval Architecture and Civil Façades* Business Unit.

Fabbrica Europe, headquartered in San Biagio di Callalta (Treviso), will represent the coordination hub for the Group's commercial, design and operational activities in the European curtain walls market.

This opens a new phase of development for the Group's business in the curtain walls segment, through an integrated, efficient and competitive operating platform that will leverage the existing production capacity, machinery, specialist expertise and know-how. The related industrial model *"Lean Curtain Wall Factory"* will also enable rapid adaptation of resources and manufacturing capacity to the volumes and characteristics of individual projects, whatever their complexity.

The new company draws on the strength and international credibility of the Somec Group with the experience gained by Fabbrica LLC in the United States, and an Italian production base geared towards creating bespoke solutions. The industrial objective is to replicate in Europe the organisational and business model successfully developed overseas by Fabbrica LLC, adapting it to the specific features of the local market.

Moreover, experienced managers in the relevant sector will support the development strategy:

Carlo Dal Cin holds the role of *Chief Operating Officer*, thus coordinating operational activities and the implementation of production processes. Dal Cin boasts over twenty years of experience gained in international contexts in the design, engineering, and construction of complex architectural façades. Over the course of his career, he has developed cross-functional skills in operations, project management, production, and procurement, operating in both Europe and North America. Before joining Fabbrica Europe, he was Deputy General Manager at the international group Permasteelisa.

With over thirty years of experience in the sector and an in-depth knowledge of the main European and North American markets, Massimo Mazzer will contribute to the company's commercial development and to strengthening relationships with clients and strategic partners. His professional path ranges from design and project management to commercial development and corporate management. Prior to joining Fabbrica Europe, he was the UK & Europe Sales Director at Permasteelisa and, before that, Managing Director at Cimolai Architectural.

Oscar Marchetto, Chairman of the Somec Group, has commented: *"The creation of Fabbrica Europe marks an important step in the development path of the Horizons BU and in the Group's growth strategy. We are thus consolidating our expertise in design, production capacity and international experience in order to build an efficient, flexible and competitive European platform. In this area, London represents the ideal starting point: it is one of the world's most advanced and demanding markets for architectural façades, as well as a prime showcase for high-value projects. The appointment of managers who have such in-depth knowledge of the sector and the target markets will further strengthen our ability to*

capitalise on the opportunities we have already identified and lay the foundations for an exciting new phase of growth in the European market".

Fabbrica Europe's incorporation coincides with the tenth anniversary of Fabbrica LLC's founding and follows the recent acquisition of the record contract for 350 Park Avenue in New York, in the heart of Manhattan.

///

Somec

Somec Group is a leading specialist in the engineering, design, and deployment of complex turnkey projects across the civil and naval sectors, operating through three business units: Horizons – Engineered Systems of Naval Architecture and Civil Façades; Talenta – Professional Kitchen Systems and Products; Mestieri – Design and Production of Bespoke Interiors.
The Group's companies operate in an integrated and synergistic way, according to strict quality and safety standards and guaranteeing a high degree of customization and specific know-how on the processing of different materials, which is a fundamental requirement in high value-added projects.
In over 40 years of history and by relying on rigorous certification and accreditation processes, Somec has achieved a reputation for quality and operational and financial reliability on a global scale.
Headquartered in San Vendemiano, Treviso, the Group is present in 12 countries and 3 continents, employing over 1,000 people and with revenues of 370 million Euro in 2025.
