PRESS RELEASE

SOMEC: MESTIERI SECURES NEW ORDERS WORTH OVER 100 MILLION EURO GROUP BACKLOG REACHES A NEW RECORD OF OVER 1.3 BILLION EURO

Chairman Marchetto: *"In the first ten months of the financial year alone, we have secured orders worth more than 772 million Euro - a clear sign that clients recognise our expertise and entrust us with increasingly ambitious and complex projects"*

San Vendemiano (Treviso), 26 October 2026 – Somec S.p.A. (Euronext Milan: SOM), specialising in the engineering, manufacturing and installation of complex turnkey projects in the civil and naval sectors, announces that its *Mestieri, Design and Production of Bespoke Interiors* Division has secured new orders worth a total of over 100 million Euro. These comprise two contracts in the naval sector worth 81 million Euro and several civil-sector projects worth over 20 million Euro.

These new orders take the Group's backlog to a new high of over 1.3 billion Euro.

The naval contracts were awarded by a leading Italian shipyard to Total Solution Interiors (TSI) and cover seven cruise ships, one of which is under option.

The first contract covers two ships for one of the world's largest cruise operators. On each ship, TSI will fit out three areas, with a total surface area of 18,400 square metres split equally between the two vessels.

Specifically, the scope of supply includes large, high-end outdoor spaces featuring swimming pools, Jacuzzis, waterfalls and bars. One of the standout features is the *Magrodome* area, crowned by an impressive retractable glass roof that allows the space to switch between open-air and covered configurations, so that it can be enjoyed whatever the weather. The project also includes two large Kids & Teens areas spread over several levels. The work will be carried out between 2027 and 2030, which is also when the related financial impact will be recognised.

The second contract covers five ships, one of which is under option, for a major US cruise line. Here, the scope of supply comprises three areas per ship, covering approximately 4,230 square metres. Including the optional ship, the work will therefore cover a total area of approximately 21,150 square metres. The work will involve some of the most prestigious spaces on board: the main restaurant, a lounge & entertainment bar, a panoramic restaurant and its bar, all located on the upper decks. Premium materials and refined finishes will define these spaces, building on the experience TSI has gained on previous projects for the same cruise line – expertise the client has once again chosen to rely on for the new ships now under construction. Execution of the work and the resulting financial impact will be spread over the 2026–2037 period.

These are complemented by new civil-sector orders worth over 20 million Euro for *hospitality*, *residential* and *retail* projects, mainly in Italy and the United States. The work will involve all the companies in the Division: Mestieri, TSI, Budri, Ceolin, Lamparredo and Skillmax. The projects include interiors for luxury hotels, high-end residences and retail spaces for well-known international brands - settings with very different functions and requirements, where the choice of materials, bespoke craftsmanship and meticulous finishing combine to translate the identity of each project into tailor-made solutions. *Hospitality* in particular continues to show strong demand, alongside the *residential* and *retail* segments - areas in which Mestieri stands out for its specialist expertise and the high degree of customisation it delivers, with the United States at the heart of the Division's growth plans. The orders will be executed, and their financial impact recognised, between the fourth quarter of 2026 and the first quarter of 2027.

Oscar Marchetto, Chairman of the Somec Group, commented: *"Our record backlog of over 1.3 billion Euro is the result of the work of recent months, the know-how of our companies and the strong*

relationships we have built over time. In the first ten months of the financial year alone, we have secured orders worth more than 772 million Euro - a clear sign that clients recognise our expertise and entrust us with increasingly ambitious and complex projects. These contracts showcase the distinctive strengths of every company in Mestieri and the Division's ability to bring challenging architectural solutions to life through its knowledge of materials, precision in execution and coordination skills. In the naval sector, which accounts for the largest share of these new orders, bringing large water areas, waterfalls, multi-level spaces and areas that open to the sky on board a ship means taking on an extraordinary degree of complexity in both design and execution. TSI rises to these challenges by drawing on its experience and its long-standing relationships with the industry's leading players. At the same time, the new civil contracts broaden an order book that is diversified across markets and clients, all of them top-tier, complementing our long-term naval contracts with projects with shorter delivery timelines".
